The method is useful for producing enzymatically-active beta-II tryptase. The active site mutants of proteolytic tryptase provide a tool to investigate the structural and functional properties of the protease and its enzymatic activity, and for modelling studies. The enzymatically-active, recombinant proteolytic tryptase produced are useful as an antigen to generate anti-human tryptase antibodies and in drug screening for compounds which act as tryptase inhibitors, antagonists, agonists, etc. AAS20775-AAS20790 encode for recombinant

                                                                                                                                                                                                                                                                                    밁
                                                                                                                                                                                                                                                                                                                                   Q
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     CC tryptases, active site mutants of these tryptases and the methods for CC producing these. The method involves the production of a DNA expression CC construct comprising a promoter operably linked to a secretion signal CC sequence which is operably linked to a DNA sequence encoding a CC proteolytic tryptase with an active site mutation (the construct drives CC expression of a mature proteolytic tryptase that lacks enzymatic activity CC due to the active site mutation, in hosts transformed to contain the CC construct). The method is useful for producing enzymatically-active beta-II tryptase. The active site mutants of proteolytic tryptase provide CC a tool to investigate the structural and functional properties of the CC protease and its enzymatic activity, and for modelling studies. The companies of the consymatically-active, recombinant proteolytic tryptase produced are CC useful as an antigen to generate anti-human tryptase antibodies and in drug screening for compounds which act as tryptase inhibitors, antagonists, agonists, etc. AAS20775-AAS20790 encode for recombinant contains the mutants.
                                                                                                                                                                                                                                                                                                                                                                                               Matches

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           CC tryptases, active site mutants of these tryptases and the methods for CC producing these. The method involves the production of a DNA expression CC construct comprising a promoter operably linked to a secretion signal CC sequence which is operably linked to a DNA sequence encoding a proteolytic tryptase with an active site mutation (the construct drives CC expression of a mature proteolytic tryptase that lacks enzymatic activity CC due to the active site mutation, in hosts transformed to contain the CC construct). The method is useful for producing enzymatically-active beta-II tryptase. The active site mutants of proteolytic tryptase provide CC beta-II tryptase. The active site mutants of proteolytic tryptase provide CC a tool to investigate the structural and functional properties of the CC enzymatically-active, recombinant proteolytic tryptase produced are cuseful as an antigen to generate anti-human tryptase antibodies and in drug screening for compounds which act as tryptase inhibitors, againsts, etc. AAS20775-AAS20790 encode for recombinant
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Matches

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Qy
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              В
                                                                                                                                                                                                                                                             This nucleotide sequence includes a coding region for human comparison to the invention provides:

Compositions comprising an isolated tryptase-7 that may include chimeric proteins that contain (a) a human tryptase for all but the active site region and (b) the substrate-binding pocket of mouse tryptase-7 or its homologues (see AAW6423-39); a method for treating a blood clot by administering a nucleic acid molecule that codes for a tryptase-7, or an expression product, to decrease codes for a tryptase-7, or an expression product, to decrease (SP); and a method of producing a mature SP by expressing the inactive zymogen in a host cell, and cleaving the enterokinase consciptibility domain. The tryptase-7 polypeptides can be used to treat disorders mediated by undesirable thrombus clot formation such as myocardial infarction and reocclusion following angioplasty
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Mast cell tryptase II/beta; human; MCP-7; mast cell protease 7; blood clot; anticoagulant; myocardial infarction; reocclusion; thromboembolism; cerebral embolism; thrombosis; therapy; ss.
                                                                                          Sequence
                                                                                                                                                thrombosis, cerebral embolism, renal vein and peripheral arterial thrombosis. They are also useful for all surgical procedures tha require decreased blood clots.
                                                                                                                                                                                                                                 such as myocardial infarction and reoccursion totalogues of blood clots associated with pulmonary thromboembolism,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Disclosure; Page 66; 92pp; English

The invention provides sequences shown in AAW63160 to AAW63169 that are inhibitors of mMCP-6. These peptides which are tryptase-6 complex inhibitors, can be used for treating a mast cell-mediated inflammatory disorder. The inhibitors can be used to treat inflammatory disorders including asthma, allergic rhinitis, urricaria and antioedema, eczematous dermatitis (atopic dermatitis), anaphylaxis, hyperproliferative skin disease, peptic ulcers, inflammatory bowel disorder, hyperresponsiveness and inflammatory skin conditions.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        CDS
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Tryptase-6 complex inhibitory peptides - used to treat mast cell-mediated inflammatory disorders e.g. asthma \,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Huang
